Bhubaneswar, Odisha, India

PROFILE SUMMARY

Detail-oriented Computer Science undergraduate focused on AI/ML and Scalable Web Architectures. Experienced in Python-based automation and data modeling through three technical internships. Proficient in developing predictive models using Scikit-Learn and building responsive interfaces with modern JavaScript. Adept at applying Agile methodologies to deliver production-ready code.

EDUCATION

Gandhi Institute for Technology (GIFT Autonomous) Bhubaneswar, India
Bachelor of Technology in Computer Science Engineering (B.Tech) 2022 – 2026

TECHNICAL SKILLS

Languages: Python, SQL, Java
AI/ML: Scikit-learn, Pandas, NumPy, Matplotlib, Feature Engineering, Statistical Modeling
Web: HTML5, CSS3, JavaScript
Tools: Git, GitHub, Docker, VS Code, Jupyter, Excel

EXPERIENCE

ASP OL Media | *Python, SQL, Git* Nagpur, India
Software Engineer Intern Oct 2025 – Feb 2026

- Developed and deployed modular Python automation scripts that optimized internal ETL workflows, resulting in a 30% reduction in manual data processing overhead.
- Architected efficient SQL queries and backend logic, improving API response times and ensuring high system availability for concurrent client-facing features.

StrivingSquad Pvt. Ltd. | *JavaScript (ES6), CSS3, REST APIs* Bhubaneswar, India
Web Designer Jun 2024 – Jul 2024

- Built mobile-first UI components using modern JavaScript, enhancing cross-browser compatibility and user retention.
- Streamlined data delivery via RESTful API integration, enabling real-time updates and improving engagement metrics.
- Implemented clean CSS architectures (BEM) to ensure design consistency across all product modules.

IIG Varsity | *Java, OOP, Collections, MySQL* Bhubaneswar, India
Java Developer Intern Jul 2023 – Aug 2023

- Engineered robust business logic modules using Java OOP principles, focusing on the implementation of scalable data structures and efficient collections handling.
- Gained hands-on experience in the full Software Development Life Cycle (SDLC), from requirement analysis to final debugging and deployment.

PROJECTS

Customer Churn Prediction System | *Python, Scikit-learn, Pandas, Matplotlib* 2025

- Built a machine learning model to predict telecom customer churn using behavioral data.
- Performed data preprocessing, feature engineering, and handled class imbalance using SMOTE.
- Trained Logistic Regression, Random Forest, and Gradient Boosting models for classification.
- Achieved an F1-score of 0.88 and identified key churn indicators such as contract type and tenure.

Loan Default Risk Prediction | *Python, Scikit-learn, Pandas, SQL* 2025

- Developed a classification model to predict loan default risk using financial and demographic data.
- Performed data cleaning, feature scaling, and exploratory data analysis on credit datasets.
- Trained Logistic Regression and Random Forest models to identify high-risk borrowers.
- Evaluated models using ROC-AUC, precision, and recall to support credit risk assessment.

ACHIEVEMENTS

- **Runners-Up, BPUT Ideathon:** Proposed an AI/ML solution for automated plant disease detection to support predictive crop health monitoring.
- **Internship Experience:** Completed three technical internships across software engineering, web development, and data-driven applications.
- **Technical Mentorship:** Conducted a Python and Scikit-learn workshop for 10+ students.
